New Skills • New Friends • A Brighter Future

EXPLORE STEM. LEARN RADIO. GET ON THE AIR!

An opportunity for senior Scouts, Guides and Leaders to take part in a weekend of training and assessment leading to an Australian Foundation Level amateur radio qualification.

Amateur radio combines science, technology, engineering and practical problem-solving, providing an engaging way to explore STEM while developing valuable communication and technical skills.

What will you discover?

-  How radio communication works
-  Radio, electricity and electronics
-  Antennas, frequencies and propagation
-  Practical operation of radio equipment
-  Foundation Level assessment
-  Working with experienced radio operators

Amateur radio can complement interests in science, technology, engineering, electronics, computing and communications, and can lead to activities such as contesting, emergency communications, satellite communication, digital radio and radio direction finding.

Training & Assessment Weekend - Saturday 31 October & Sunday 1 November 2026

Held at the J. H. Kaye Scout Training Centre, Heathcote

ENROLMENTS NOW OPEN – Places are limited — early enrolment is recommended.

Training provided by experienced members of The St George Amateur Radio Society
Qualification assessments conducted by ACMA Accredited Assessors
